

Hi, I'm Rizky Dwi Budi Astra

# **SIMPLE WEB CATALOG DESIGN**

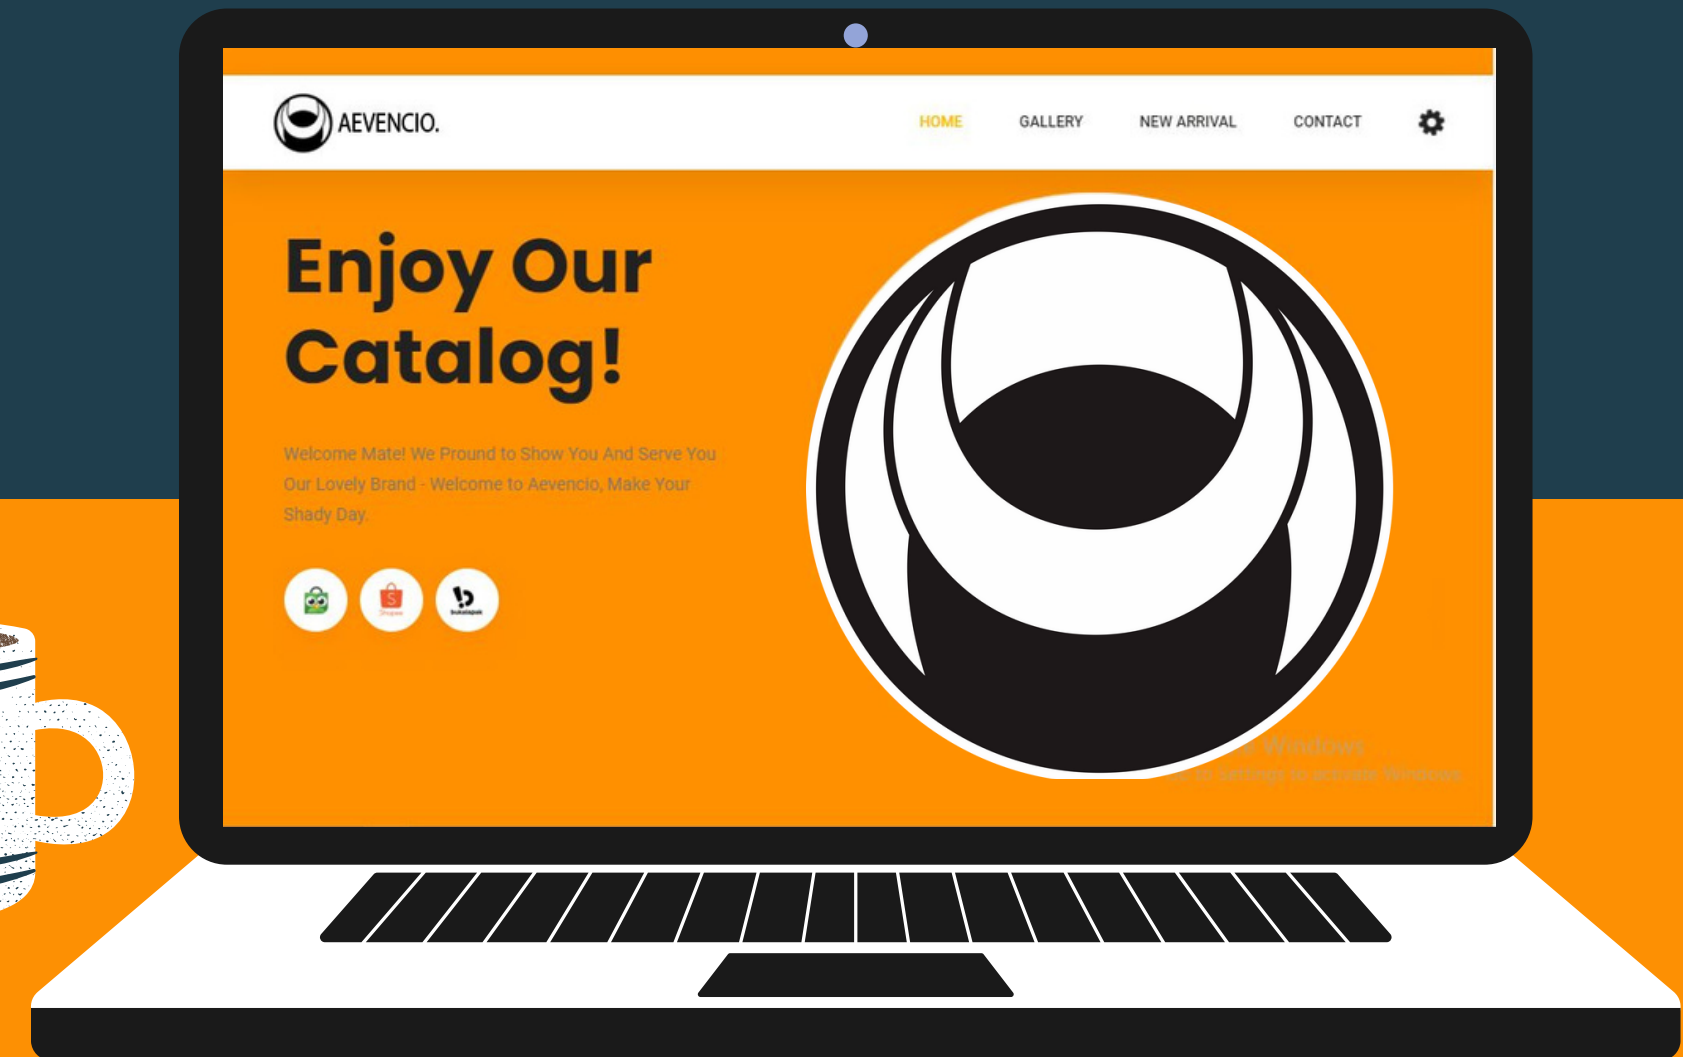

Welcome to my portfolio, this time I will explain the website that I have created, the clothing catalog website. The website that I developed aims to make it easier for website owners to promote the company and easily manage the products they sell.

# SIMPLE BUT STUNNING

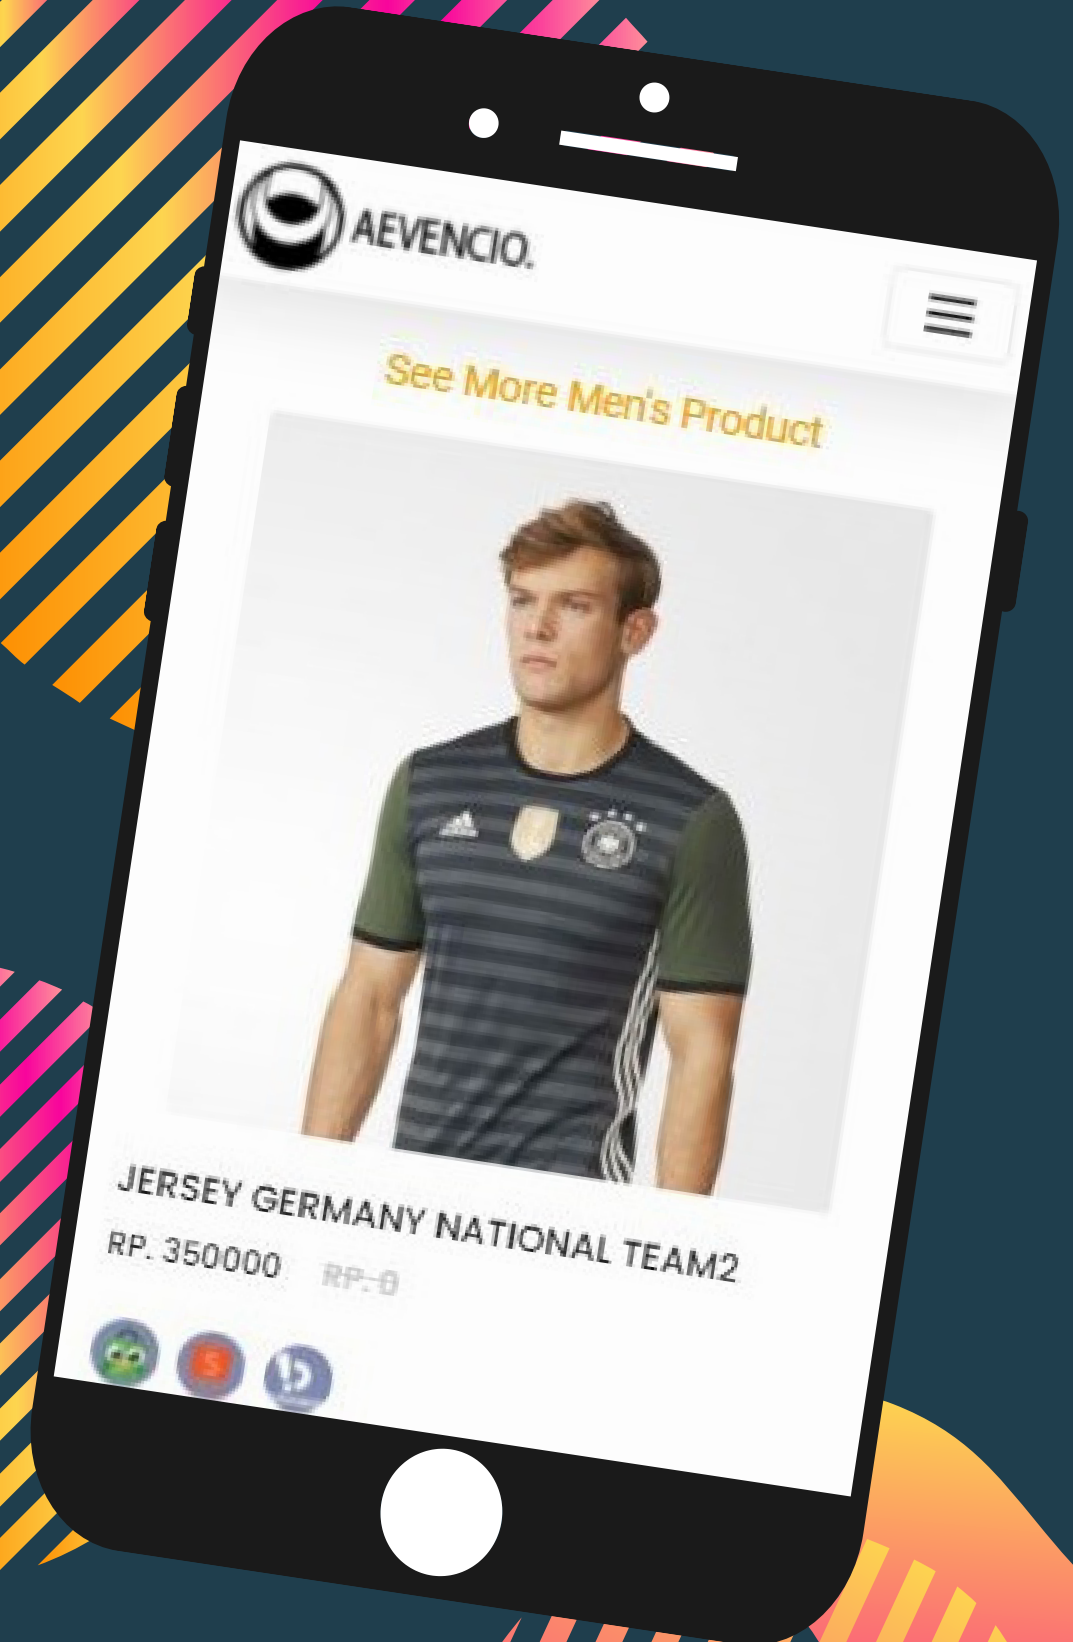

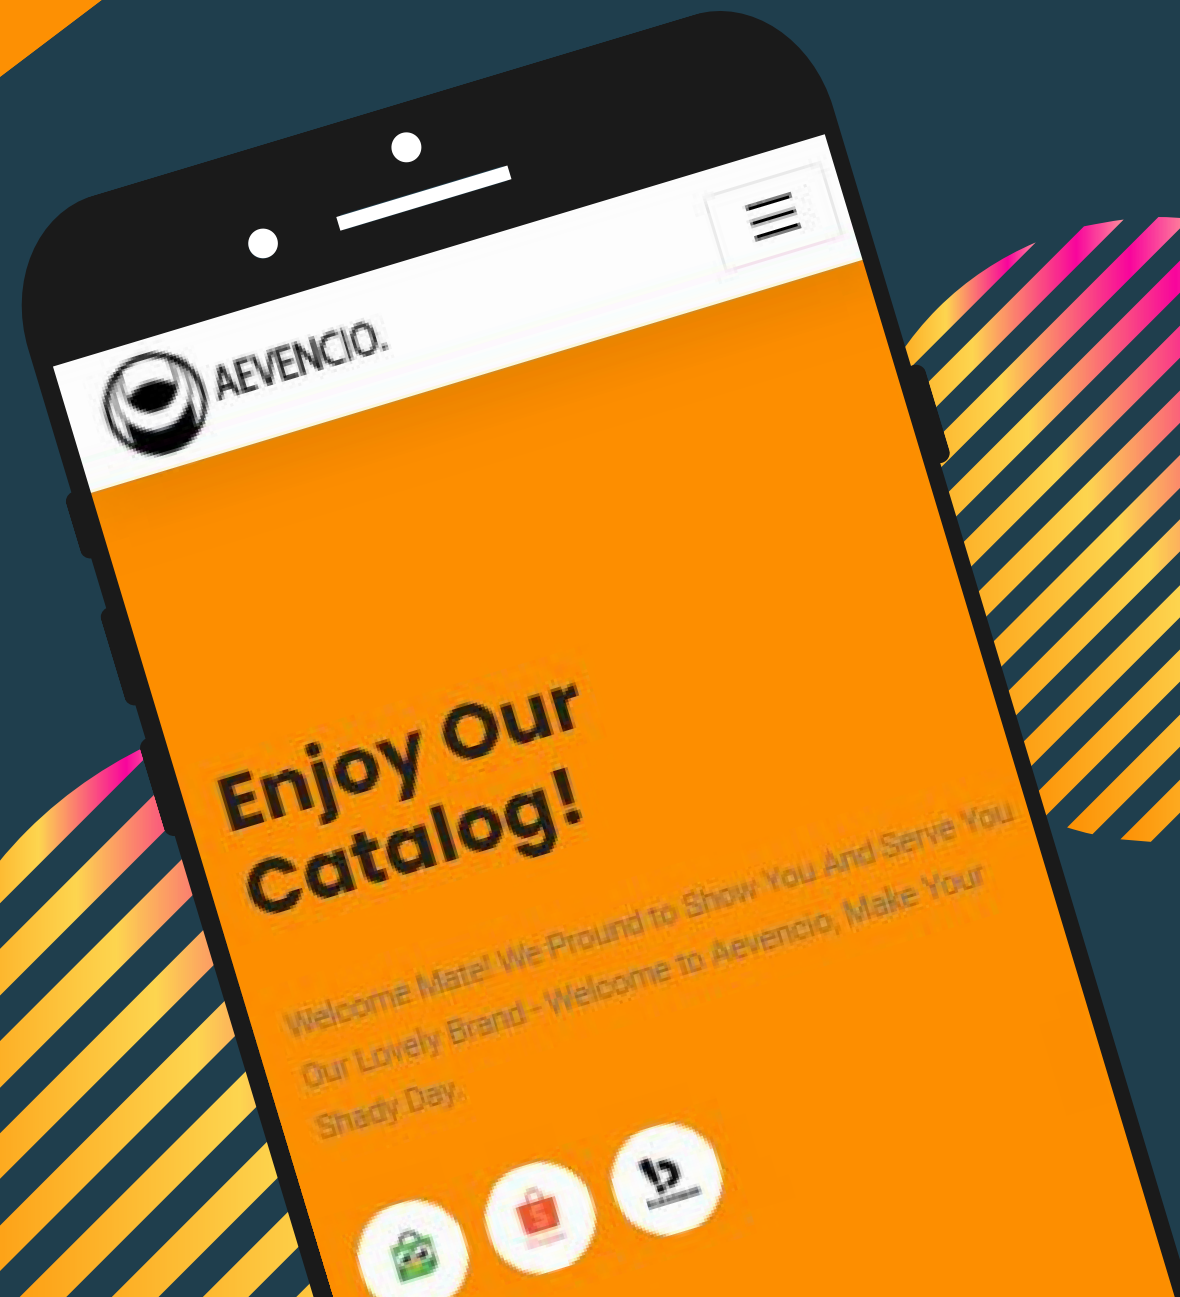

This website makes it easier for sellers, where sellers only need to promote this website link to prospective buyers, without promoting many ecommers profiles that the seller has.

This website also will make it easier for potential buyers to see all the products sold in the various ecommers profiles that the seller has.

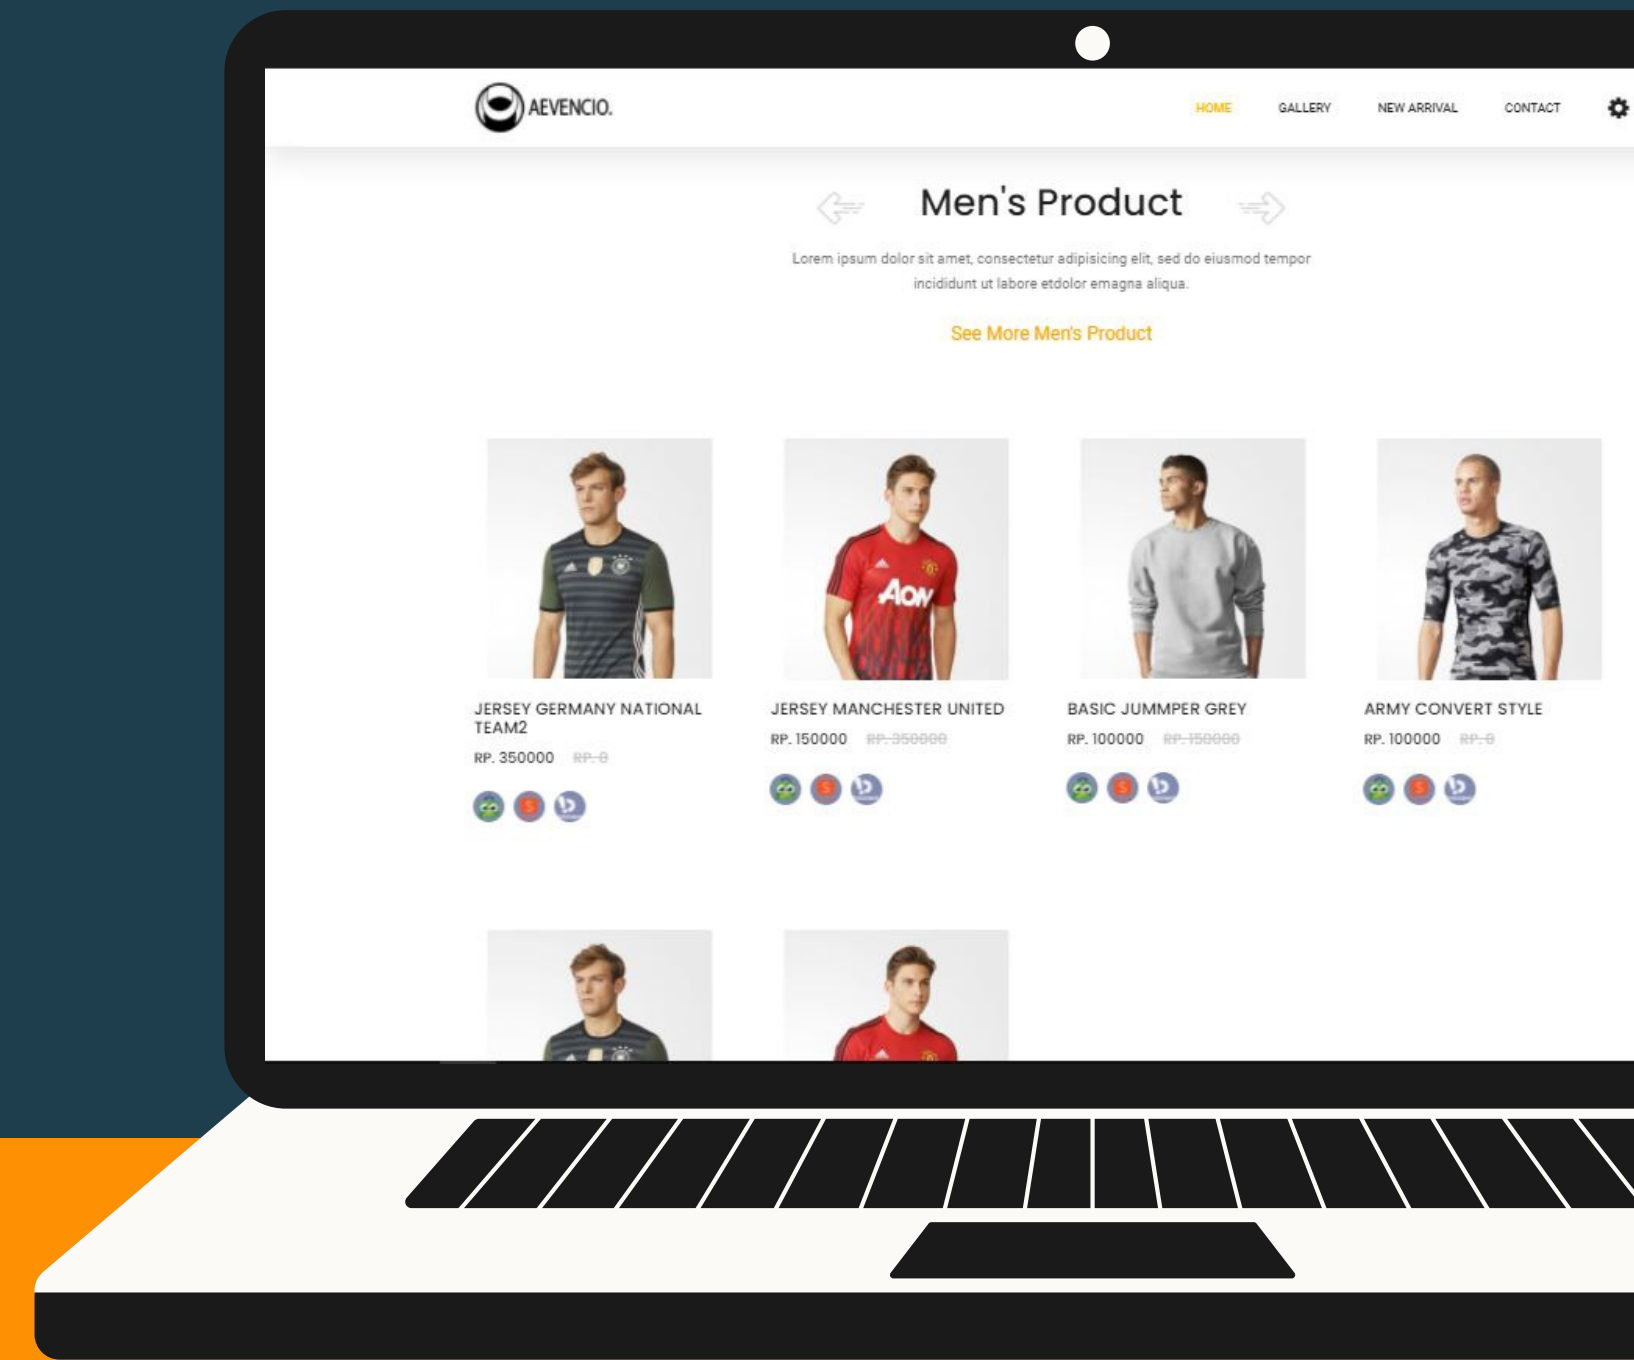

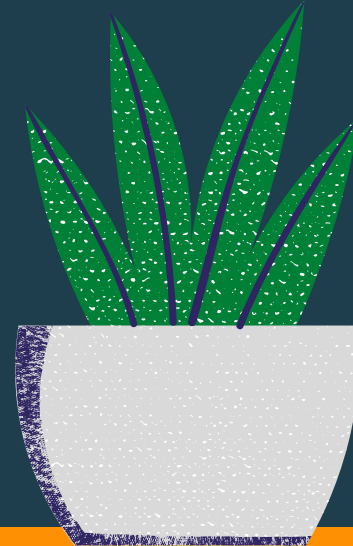

# USER FRIENDLY

With a simple design, it makes it easy for users to reach all the features and menus provided.

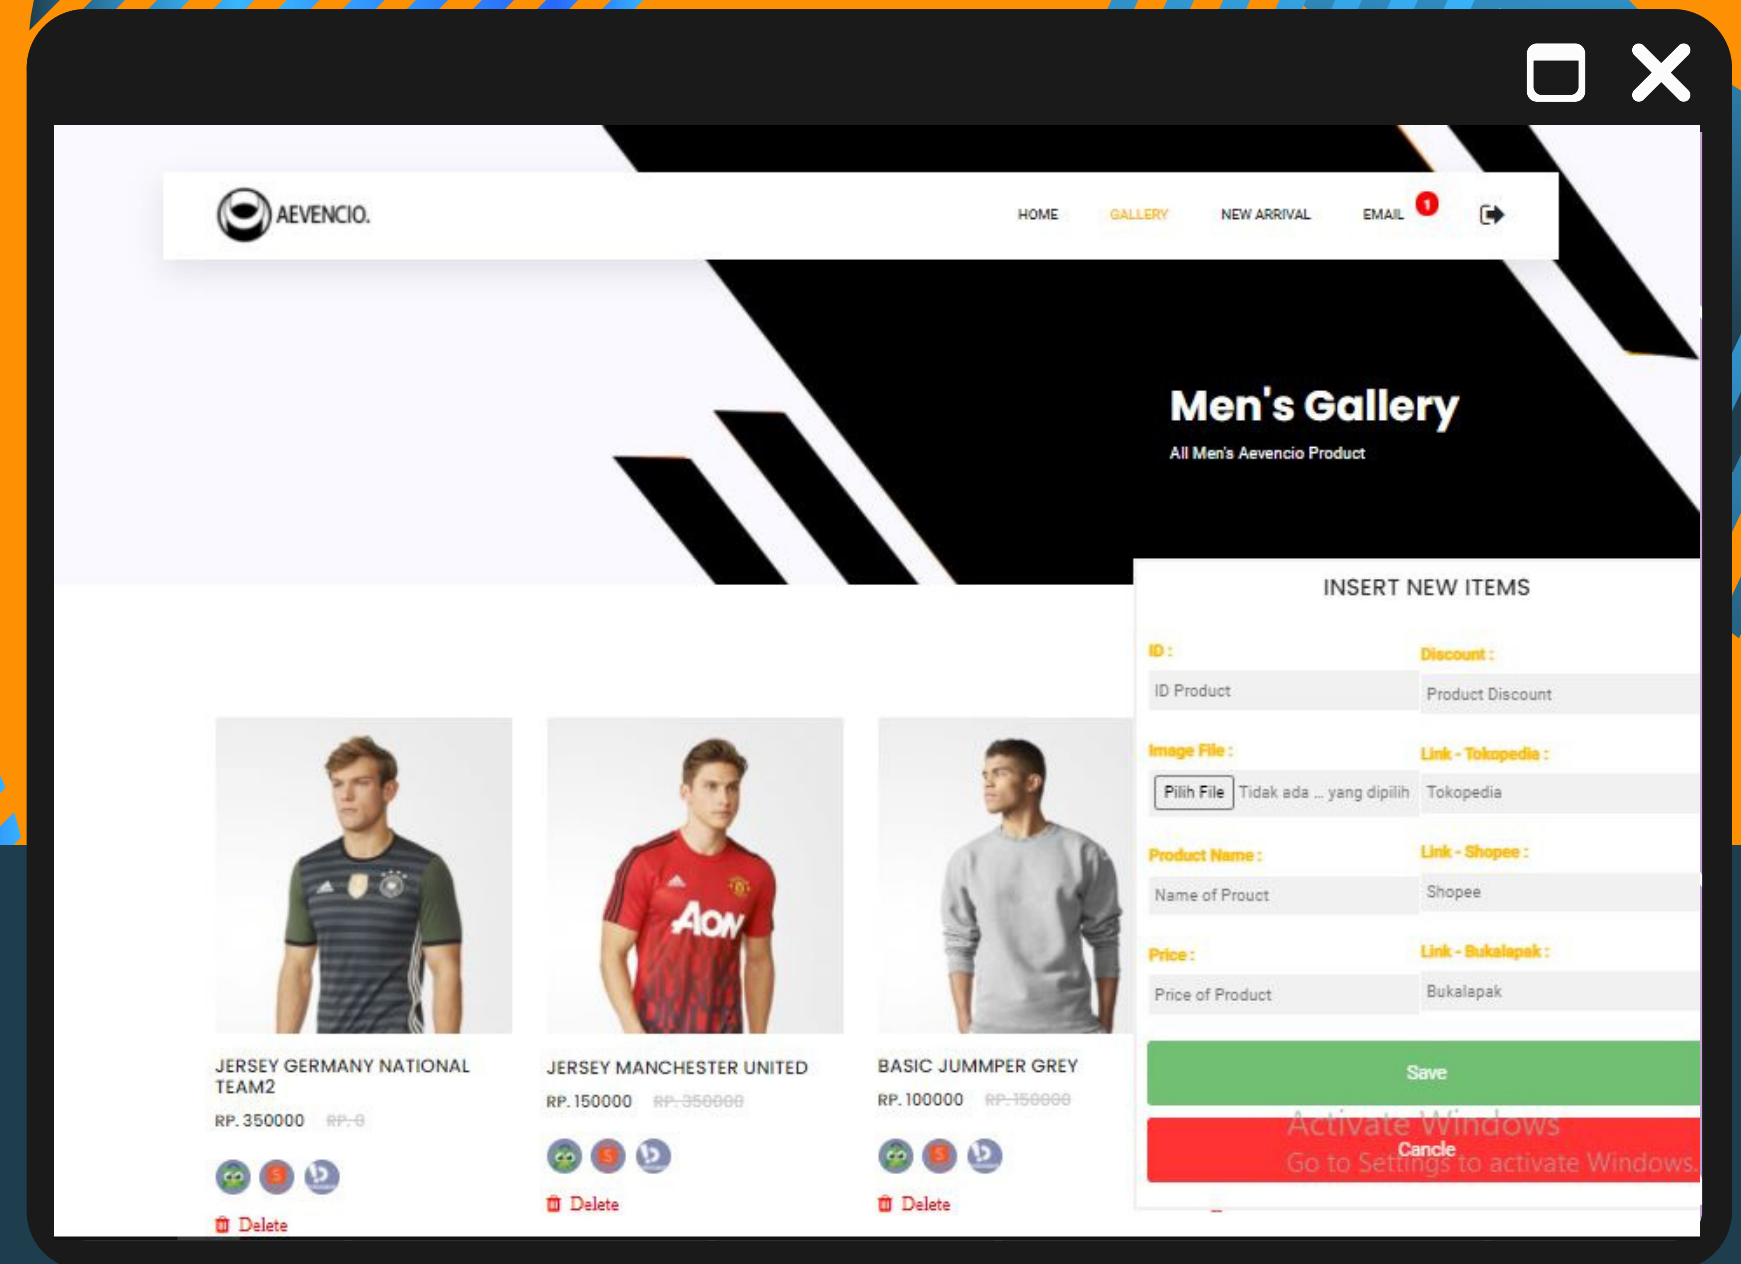

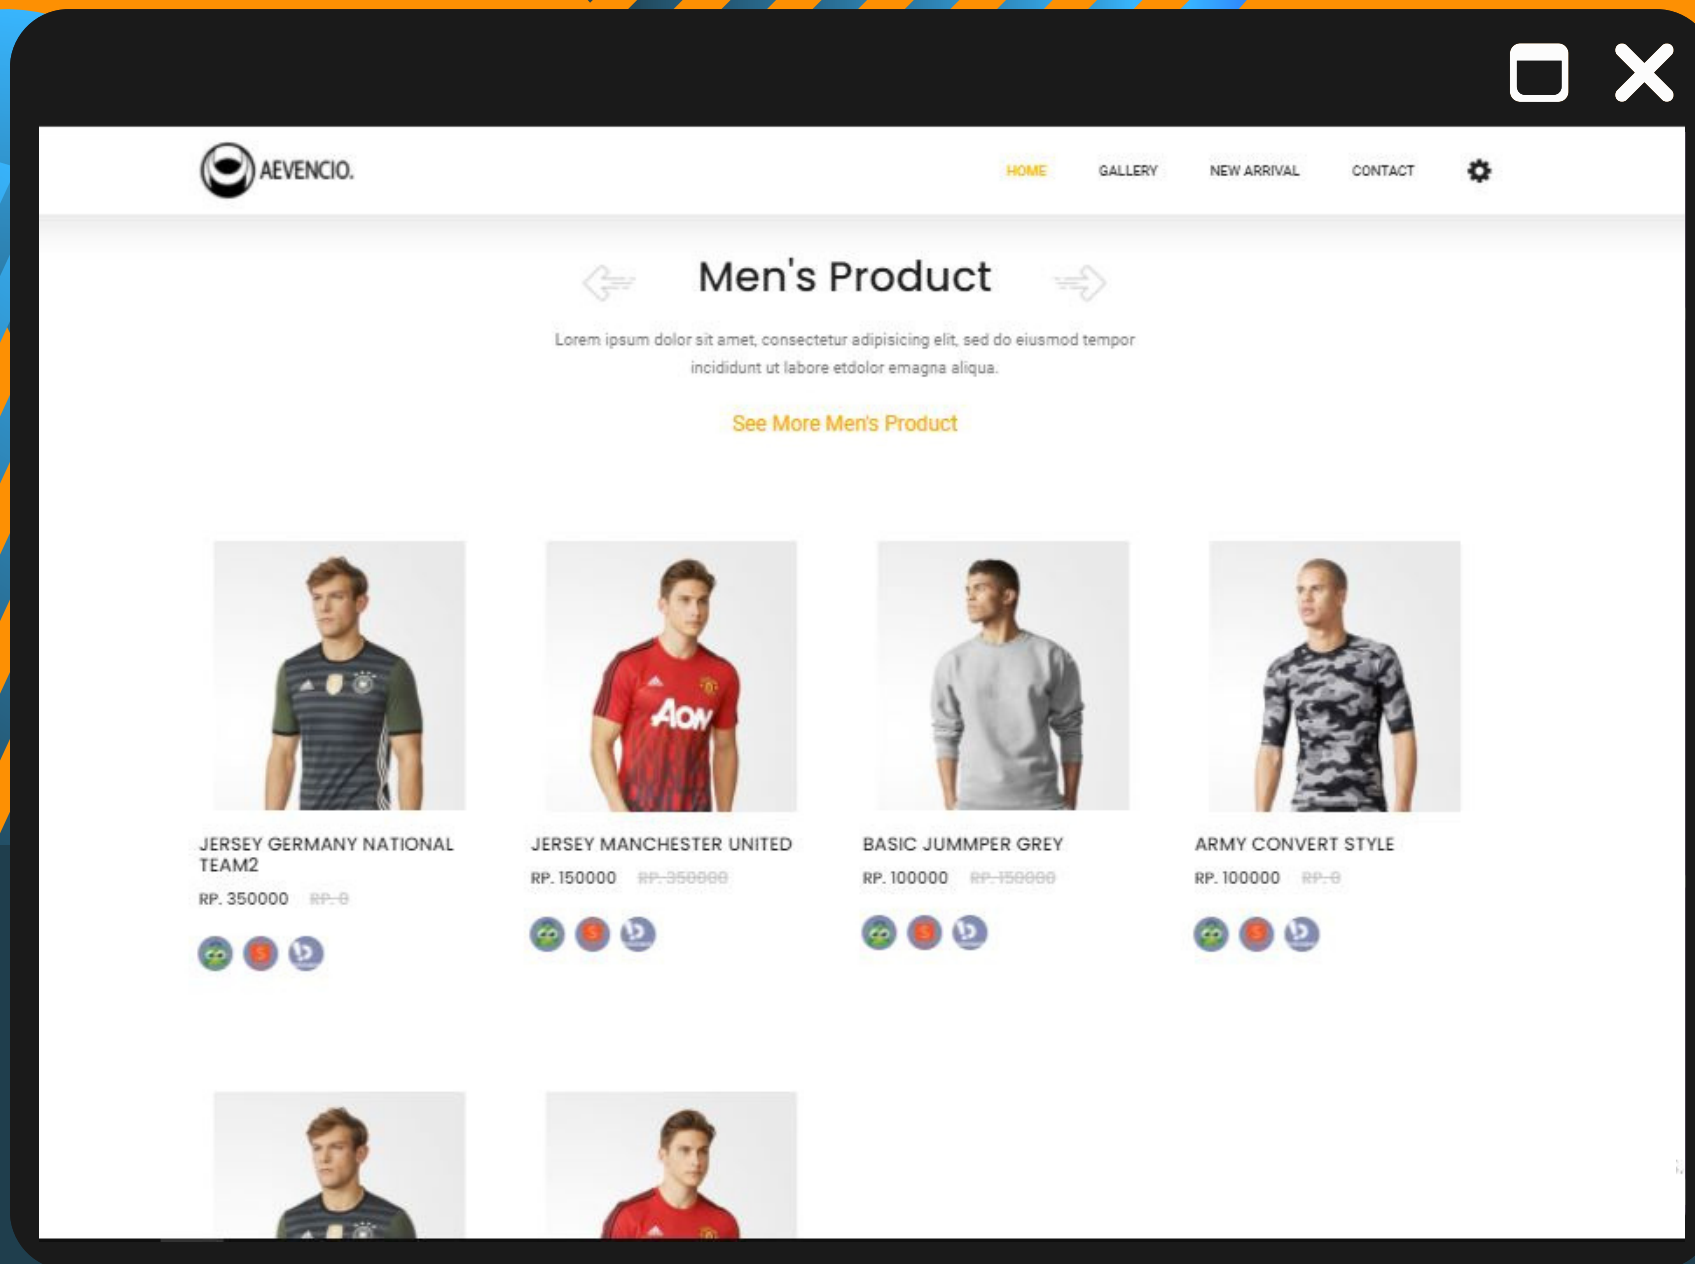

# FULL CONTROL

For website owners, easily to input and delete products that are being sold, so that later they can be displayed directly to users.

The input display used is in the form with a simple pop up, making it look simple and easier for the product import process.

With my brief explanation above, it is hoped that it can provide a suitable description of the website that I have created. if any suggestion please let me know through my contact:
